Nikhil Siwan

Software Developer

+91 88130 60916 | developer.nikk@gmail.com | linkedin.com/in/nikhilsiwan | github.com/thisisnikkk

Summary

Software developer with a year of production experience across **React Native**, **Next.js** and applied AI. Built a real-time **RAG** agent (**GPT-4o** over **Pinecone**, with a live video avatar) that has brought in **220+ qualified leads** for a client. Builds mobile features on a four-person product team and runs the company's internal automation on **n8n**, cutting new-hire onboarding from hours to minutes.

Experience

Software Developer Jul 2025 – Present

SolarioTech *Mohali, Punjab*

- Earned a permanent Software Developer role within **6 months** of joining as a web development intern; delivered **5+ client web and mobile products** and a full company-site rebuild, all scoring **93–100 Lighthouse performance** and **100 SEO**.

Daisy | *Conversational AI Agent* Next.js, GPT-4o, Pinecone, HeyGen, ElevenLabs

- Designed and shipped **Daisy**, a conversational **AI agent** embedded in a client's marketing site, pairing a **HeyGen** video avatar and **ElevenLabs** voice over **GPT-4o** on a **Next.js** stack.
- Engineered the **RAG** retrieval layer, chunking and embedding company content in **Pinecone** so answers draw from the client's verified material instead of model assumptions.
- Replaced the site's static intake form with a guided conversation that qualifies visitors, books meetings through **Calendly**, and logs each lead to the **CRM** automatically, capturing **220+ qualified leads** to date.

LittleBirdi | *Cross-Platform Mobile App* React Native, Google Maps, TanStack Query, Firebase

- Building **LittleBirdi**, a location-based venue discovery and social app for **iOS and Android**, as one of **two React Native developers** on a four-person team; own the full app UI, the **auth module**, and its supporting APIs.
- Developed **offline support**, the social feed, **Google Maps** venue discovery and saved collections, plus Instagram-style inline translation of captions and comments through **Google Cloud Translation**.
- Optimized cold start to **236 ms** (**67% faster**) and reduced API response times by **47%**, measured in **Firebase Performance**, by memoizing styles and callbacks, reworking list rendering, and migrating server state from Redux to **TanStack Query**.

Internal Automation | *Ops Tooling* n8n, agentic workflows

- Automated the company's internal operations in **n8n**, cutting new-hire onboarding (credentials, software access, device assignment, documents) from **2–3 hours** of manual setup to **about 5 minutes**; the same **agentic workflows** now handle offboarding, task and project assignment, and the inventory and consumables records once kept by hand.

Technical Skills

Languages: JavaScript, TypeScript
Mobile: React Native (Expo and bare CLI)
Release: EAS Build, Google Play Console, App Store Connect
Web: React.js, Next.js, Tailwind CSS, shadcn/ui, Aceternity UI, Magic UI, Framer Motion
State & APIs: TanStack Query, Redux, REST APIs, Next.js API routes
AI & Automation: RAG, Pinecone, agentic workflows, n8n, MCP servers, prompt orchestration, ElevenLabs, HeyGen
Tools: Git, GitHub, Postman, Vercel, Chrome DevTools, Lighthouse, Claude Code, Codex, Antigravity

Education

BRCM College of Engineering and Technology Bhiwani, India

Bachelor of Technology in Computer Science, ***8.2 GPA*** *Aug. 2021 – May 2025*

Certifications & Achievements

- **Meta Certified Front-End Developer** — Coursera, Jul 2023.
- Placed **4th** in the **Empower Hackathon** organized by IDEOS, **IIM Ahmedabad**.
